

A scatter plot with 'EnclosedPorch' on the x-axis. The x-axis has major ticks at 0, 200, and 400. The y-axis is unlabeled but has a vertical line at x=0. Data points are blue dots. Most points are clustered near the y-axis (x=0) and between y=0 and y=100. There are several points at higher x-values: one near (200, 100), one near (250, 150), one near (300, 100), one near (400, 100), and one near (500, 100). There are also a few points at very high y-values, near the top of the plot area.
